Objective

Motivated and passionate front-end web developer seeking an entry level position creating websites and applications. Graduate of Case Western Reserve University Full Stack Coding Bootcamp.

Languages & Frameworks

HTML, CSS (SASS), JavaScript, and React

Development/Design Skills

- React
- Responsive Web Design
- CSS/SASS/Styled-Components
- Framer-Motion/GSAP/CSS Animations
- Node.js
- API's/JSON

Development Experience

- Designed Portfolio highlighting personal web development projects I have created using React, styled-components, and framer-motion along with CSS transitions. Portfolio also features a functioning email contact form and design elements created using Figma.
- Deployed Forest City Runs, a full stack social media application that uses a MySQL and express backend with a React frontend to give user's common social media functionality such as creating posts, liking, and commenting.
- Created Sunny, a fully functioning weather application using the Open Weather API to provide users with the date and current weather conditions for any city of interest.
- Built Rock, Paper, Scissors game using React and state management to keep track of user's and computer's choices, result of the game, and the user's score.
- Redesigned the popular Netflix landing page using React, demonstrating ability to recreate a pre-existing landing page or Figma/Adobe XD design.
